DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 1 is rejected under 35 U.S.C. 102 (e) as being anticipated by Uedahira et al. (Uedahira) (Patent Number 6,705,077).

Regarding claim 1, Uedahira discloses NO_x discharge quantity estimation method for an internal combustion engine (3) equipped with an EGR apparatus (9) for circulating to an intake passage of the engine a portion of exhaust gas flowing through an exhaust passage of the engine, characterized in that a quantity of NO_x contained in exhaust gas discharged from the exhaust

Art Unit: 3748

passage to the outside is estimated on the basis of a quantity of NO_x generated in a combustion chamber as a result of combustion and a quantity of NO_x circulated into the combustion chamber via the EGR apparatus (e.g. See Figs. 3-8; col. 9, lines 30-67; col. 10-12, lines 1-67; and col. 13, lines 1-20).

Allowable Subject Matter

Claims 2-10 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or render obvious the claimed combination including the steps of estimating, as a combustion-generated NO_x quantity, a quantity of NO_x generated within the combustion region as a result of combustion, and an NO_x quantity in a non-combustion region, the non-combustion region being the remaining region of the combustion chamber; and estimating, on the basis of the combustion-generated NO_x quantity and the NO_x quantity in the non-combustion region, a quantity of NO_x contained in exhaust gas discharged from the exhaust passage to the outside.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of six patents:

Art Unit: 3748

Daudel et al. (Pat. No. 6826471), Yanagihara et al. (Pat. No. 5826427), Yokota et al. (Pat. No. 6269634), Nishimura et al. (Pat. No. 6725650), Hirota et al. (Pat. No. 5884476), and Ito et al. (Pat. No. 5775099) all disclose an exhaust gas purification for use with an internal combustion engine.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Binh Tran whose telephone number is (571) 272-4865. The examiner can normally be reached on Monday-Friday from 8:00 a.m. to 4:00 p.m.
